

CHHATTISGARH GREEN SUMMIT

1st EDITION' Pre-LokManthan Editon Event

The journey of LokManthan started in 2016 and has evoked massive public response. Chhattisgarh Green Summit, a Pre-LokManthan Event - aimed at bringing together artists, thinkers, intellectuals and social activists from across the Chhattisgarh state as well as the country - is a cultural mahakumbh that reshapes narratives and equips the nation to embrace its civilizational role. The first edition of Chhattisgarh Green Summit, a Pre-LokManthan Event to be held at National Institute of Technology Raipur during September 26-28, 2024 - it will provide a common platform for intellectuals and those excelling in diverse fields to contribute to the idea of Rashtra (nationhood). Devoted to the consciousness of our nation's unity, humane values, and Lok collection, LokManthan is organized by Prajna Pravah, an organisation that works to foster a deeper understanding and appreciation of Bharat's cultural and intellectual heritage.

MISSION

Visualised as a pre-LokManthan event, the Chhattisgarh Green Summit will promote the Lok (indigenous) traditions of sustainability, environmental consciousness & community engagement, deeply embedded in Chhattisgarh's indigenous eco-system since time immemorial. The Summit aims to highlight the rich and diverse natural and cultural heritage of Chhattisgarh, showcase the inter-linkages & focus on the need for an integrated approach for sustaining this heritage.

The Summit will strive towards preserving, maximizing and developing the potential of the unique biodiversity zone of Chhattisgarh through various awareness programmes highlighting, amongst other things, the multifaceted sustainable practices of the state's indigenous people and their perspectives on environment, which would also be a learning experience for the participants. The Summit's discussions will link and draw lessons from science, culture & market mechanisms, besides dwelling on threats posed & strategies to deal with climate crises.

FOCUS AREAS

Forest dwelling community

Eco tourism

Climate change

Herbal medicine

THEMES

Sustainable industrialization of non-timber forest products

Forest conservation: a community model

Carbon credit for the green sector
