

SECURITY GADGETS:-

The objective of installing security devices and systems is to increase the safety and security of the campus community through the use of security controls designed to delay, detect and deter inappropriate and unauthorized conduct. Security devices and systems are the technological element of the campus security program which works with the operational and architectural elements. It is the cumulative effect of the use of security measures as part of the campus security program as well as assessment and response to inappropriate and unauthorized conduct that produces the desired effect of increasing the personal safety of the individuals that make up the campus community. The Security team always alerts to response any type of incidents in the campus. The security team utilizes a number of technologies to decrease response times to calls for service and increase the effectiveness of the campus security personnel. For adequate security and safety of the campus and the students, the security agency has provided all the latest security gadgets in NIT Campus, the under mentioned securities gadgets have been introduced in the campus security and fire safety wing:-
