## ABOUT THE INSTITUTION

Till as late as 1956, our Nation had only three technical institutes offering courses in the much needed fields of Mining and Metallurgical Engineering. In view of this fact and also with an aim of harnessing the ample mineral resources of the region, this institute, presently recognized as NIT Raipur, was set-up on 1st May 1956 as Government College of Mining and Metallurgy. The first President of independent India honorable Dr. Rajendra Prasad laid the Foundation stone of the college building on 14th September 1956. The construction work was completed in 1962 and on 14th March 1963, India's first Prime Minister Pt. Jawaharlal Nehru performed the inauguration. The first session of the college commenced from 1st July 1956 with the admission of 15 students each in Mining and Metallurgy Engineering. In 1958-59 with the commencement of additional courses in Civil, Mechanical and Electrical Engineering the college came to be known as Government College of Engineering and Technology. Later graduate courses in Chemical Engineering (1965), Architecture (1984), Electronics (1985), Information Technology, Computer Science and Technology (2000), Biotechnology, Biomedical Engineering (2003) were also started. In view of its great past with 50 years old record of excellence and several strengths, the institute has been declared as National Institute of Technology (NIT) by the Central Government on 1st Dec. 2005.

National Institute of Technology, Raipur (NITRR), hence formed in the year 2006, is an Institute of national importance and presently runs academic courses in 12 disciplines in the form of graduate and post graduate courses. The institute also inducts regular and part-time scholars for PhD courses. In addition to these, the institute intends to provide continuing education in a very broad spectrum keeping in view the needs of industries, academic institutions, research organizations and, last but not the least, the society. The institute is committed to the challenging task of development of technical education by preparing seasoned graduates in highly sophisticated field of engineering and technology. Development of India as an emerging industrial power is a demanding exercise as it involves the combination of cost effectiveness and efficiency along with producing world-class technology at the cutting edge. For about five decades we have been doing it with utmost sincerity and commitment at NIT Raipur.

## ABOUT DEPARTMENT

Department of Mechanical Engineering, NIT Raipur, offers undergraduate program (B.Tech.) and three Postgraduate programs (M.Tech.). It is one of the largest departments of the institute with intake of 90 students for undergraduate course and (17+13+13=43) students for post graduate course. Department also offers Ph.D. program in all relevant discipline of Mechanical Engineering including Design, Production, Thermal and Industrial Management.

### Vision:

“To produce innovative, entrepreneurial and successful engineers and technologists of high caliber for the nation, to serve as a valuable resource for industry, academia and society”

### Mission:

1. To provide the students and the faculty with opportunities to create, interpret, and apply the knowledge in the field of Mechanical Engineering.
2. Provide technological service to local, national, and international communities.

### Programme Educational Objectives:

Under the Post-graduate Mechanical Engineering program in Industrial Engineering & Management, the objectives aim to produce qualified Mechanical Engineering Post graduates who will:

1. Possess advanced knowledge and understanding of the specialization thus enabling them to tackle on-field problems, as well as pursue further academic achievements through research.
2. Possess entrepreneurial, managerial, analytical, decision-making, problem solving and communication skills.
3. Conduct themselves in a responsible, professional and ethical manner.
4. Inculcate an attitude for life-long learning process.

(INSTITUTE OF NATIONAL IMPORTANCE)  
G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

## Programme Outcomes:

The post graduate program in Industrial Engineering & Management has been designed to prepare graduates who will:

1. Possess knowledge of modern managerial and industrial concepts, conduct in depth analysis and studies and apply expertise practically.
2. Work as well as manage multi-disciplinary projects to enhance skills, make effective oral presentations and prepare technical documents effectively.
3. Develop professional and ethical attitude and become socially responsible citizens.
4. Be able to understand global issues and conduct independent research in the emerging areas.

## ABOUT THE PROGRAMME

NIT Raipur's Post Graduate M.Tech in Industrial Engineering and Management (M.Tech in IE&M) aims to groom young managers who will not only design better procedures and systems but also manage the associated technologies successfully. M.Tech in IEM blends classroom work and along with research work in form of a yearlong Thesis work. Modeled as a general industrial and management program, it provides a holistic approach towards industries and business, which sets it apart from others post-graduation programs available today.

It's our privilege to present the Post Graduate M.Tech Program in Industrial Engineering and Management. Students of IE&M are adaptable to the astute requirements of the global industrial landscape. They are multitalented with a specialized focus on managing businesses in an interconnected global economy.

NIT Raipur IE&M students are good inputs in functional areas of industries requirements, technology management, general management, behavioral sciences, teaching requirements at best Educational Institutions, decision sciences, quantitative techniques, operations and supply chain management. These help them to sharpen their techno – managerial, business and analytical skills. A dedicated Quality Improvement Program (QIP) process through Summer Internship, Field Projects, Industry Interactions, Live Case Studies, Industry Key Note Sessions interspersed with regular lecture and tutorial sessions becomes the hallmark of academic excellence of our Post Graduate M.Tech Program in Industrial Engineering and Management. This is best reflected in greater opportunity and faster upward mobility in their chosen corporate careers of our graduates in Industrial Engineering and Management. A post graduate qualification in Industrial Engineering and Management will certainly provide our students with the cutting edge in managing industries locally and globally.”

## FACULTY OF INDUSTRIAL ENGINEERING & MANAGEMENT (IE&M)

NAME	DESIGNATION	EDUCATIONAL	AREA OF INTEREST
Dr. A. M. Rawani	Professor	B. E., M.Tech, Ph. D.	Industrial Engg & Management, Strategic Management.
Dr. N. Jain	Associate Professor	B. E., M. Tech , Ph. D.	Solid Mechanics, Vibration, Machine Design & optimization.
Dr. S. K. Mukti	Associate Professor	B. E., M. E. Ph. D.	Industrial Engg & Management, Enterprise Resource Planning, Management Information System, Production Technology.
Dr. A. R. Singh	Associate Professor	B.Tech, M.Tech, Ph. D.	Industrial Engg, Supply Chain Management, Optimization.
Dr. M.K. Pradhan	Associate Professor	<u>B. E., M.Tech, Ph.D.</u>	Manufacturing of Advanced Materials, Additive Manufacturing Design of Experiments, Micro/Nano Manufacturing, MEMS
Dr. H. K. Narang	Assistant Professor (Grade-I)	B.E., M.Tech, Ph. D.	Production Engg, Arc Welding, Composite Material, FEM Modelling, Soft Computing.
Dr. M. S. Rajput	Assistant Professor (Grade-I)	B. E., M.Tech, Ph.D.	Advanced Manufacturing Processes, Computer Aided Manufacturing, Rapid Prototyping, Automation & Virtual Instrumentation, Production Management.
Dr. Jagadish	Assistant Professor (Grade-I)	B. E., M.Tech, Ph.D.	Green Manufacturing, Advanced Manufacturing Process, Composite Material and Characterization, Decision Making Tools, Soft Computing Techniques, Optimization,
Dr. S. Kumar	Assistant Professor (Grade-I)	B. E., M.Tech, Ph.D.	Welding and Joining, materials design, kinetic precipitation, rolling and forging, hot deformation, Physical simulation, develop CCT and TTT diagrams for different grades of steels, FEM simulation, Structure-properties correlation of steels, Al, Ti, Ni based alloys, additive manufacturing.
Dr. K. S. Bal	Assistant Professor	B. E., M.Tech, Ph.D.	Laser beam and electron beam welding, Finite element modeling, Microstructural characterization of metals and alloys, Corrosion, Optimization.

**Contact Hours and Credit:**

L	T	P	Credit
3	1	0	4

## **COURSE OUTCOMES:**

At the end of the course, Student will be able:

1. To understand the need and importance of productivity.
2. To critically analyze existing methods of doing the job and evolve efficient and economical methods.
3. To understand ways of determining standard time for completing the job.
4. To apply work analysis and work measurement to office work.

## **SYLLABUS**

### ***PRODUCTIVITY CONCEPTS AND TECHNIQUES FOR ITS IMPROVEMENT***

Introduction, Definitions of productivity, Productivity of materials, Productivity of land, buildings, machines and manpower, Factors contributing to productivity improvement, Work content and ineffective time, Improving productivity by reducing work content, Improving productivity by reducing ineffective time, Management of productivity.

### ***WORK STUDY***

Introduction, Definition, Basic procedure, Prerequisites of conducting a work study, the human factor in the application of work study, the influence of working conditions on work study, Ergonomics.

### ***METHOD STUDY***

Introduction to method study and the selection of job, Definition and objectives of method study, Procedure, Selection of job, recording of facts: Flow process charts, Man type, Material type, Equipment type, Critical Examination: The questioning technique, The principles of motion economy, Micro motion study, The simo chart Development & installation of improved method.

### ***WORK MEASUREMENT***

Purpose of work measurement, The techniques of work measurement, Time study & work sampling method, Rating, Allowances, Determination of standard time, PTS.

**COURSE OUTCOMES:** After studying this subject, Student will be able to:

1. Develop mathematical model of real life situations/problems.
2. Solve the different LPP, transportation, assignment problem by different methods/algorithms.
3. Develop network model of real life problem and analyze/solve/synthesize by different algorithms like shortest route, minimum spanning tree, maximum flow etc.
4. Optimize multi-objective problem through different algorithms.
5. Develop sequential, deterministic and stochastic case modules and solve/analyze the problem through forward and backward recursion equations and Markov Process.

## **SYLLABUS**

### ***INTRODUCTION***

Theory of Simplex Method, Duality Theory, Dual simplex method, Revised simplex method, Transportation, Assignment, Sensitivity analysis.

Integer Programming: Cutting plane method, Branch and bound method.

### ***NETWORK MODELS AND DECISION***

Shortest Route problems, Minimal spanning tree problems, Maximal flow problems. Decision analysis, Decisions under risk, Decision trees – Decision analysis with experimentation, Utility theory, Decisions under uncertainty.

### ***MULTI-OBJECTIVE DECISION MODELS***

Introduction to multi-objective decision making, Concept of pareto-optimality, Goal programming formulation, The weighting method of solution, Analytic hierarchy process

### ***SEQUENTIAL DECISION MAKING (DETERMINISTIC CASE)***

Sequential decision models, Dynamic programming, Bellman's principle of optimality, Forward recursion and backward recursion, discrete state discrete time case, Continuous state continuous time case.

**COURSE OUTCOMES:** At the end of this course, the students are expected to be able to:

1. To classify and distinguish data, information and knowledge in context of information management.
2. To construct database management system and data model to enhance the performance of an organization.
3. To develop management information system illustrating various structured analysis tools.

## **SYLLABUS**

### ***INTRODUCTION***

MIS Framework, Importance, Concept, Definition, Nature and Scope, Structure and Classification, Types of Information, Information Quality, Dimensions of Information, Human as an Information Processing System

### ***INFORMATION TECHNOLOGIES***

Basics of Computer System, Computer Software, Hardware and Programming Languages. Database Management System (DBMS), Database Hierarchy, Types of Database Structures or Data Models, Structured Query Language (SQL), Advances in Database Technology.

### ***BUSINESS APPLICATIONS OF INFORMATION SYSTEMS***

E business and E Commerce- Introduction, Cross functional Enterprise Information System, E-Commerce, Decision Making and Decision Support System (DSS).

### ***DEVELOPMENT OF MIS***

System Development Approaches, System Development Stages, System Analysis and Design, Structured Analysis Tool, Application of Operational Information Systems to Business.

### ***MANAGEMENT OF INFORMATION RESOURCES***

Implementation Processes, Maintenance, Evaluation and Security of Information System, Protection of Information System, Information System Planning, The four Stage Model of IS, Information Resource Management (IRM), Organization of Information System and End-User Computing.

## **COURSE OUTCOMES:-**

At the end of this course, the students will be able to:

1. Develop flowcharts and create programmes for solution of simple problems.
2. Understand structured programming concepts especially related to managerial theories.
3. Execute managerial algorithms using Matlab/C/Excel.
4. Solve the managerial problems using computer programming.

## **SYLLABUS**

### ***FUNDAMENTALS OF PROGRAMMING IN C/ MAT LAB:***

Variables and Arithmetic statements, Arrays, Functions, Data types, Flow of control, Functions, Recursion, Pointers and strings, Bitwise operators and enumeration types, Structures and unions, Linear linked lists and list operations, Basic I/O functions.

### ***PROGRAMMING AND PROBLEM SOLVING IN C / MAT LAB:***

Computer organization, Steps involved in computer programming, developing algorithms and flow charts for business problem, Efficiency of algorithms, Program design methods, Top-down modular programming, Measures of program performance.

### ***SUPPLY CHAIN NETWORK DESIGN:***

Basics of Network, Decisions, Mathematical modelling for supply chain echelons with flow, structure, capacity constraints etc.

Algorithms for solving Network design problems Flow, capacity based problems, integer problems, and binary problems

### ***COMPUTERIZED LAYOUT PLANNING:***

Quantitative, Qualitative, and multi-objective, Limitation of Computerized Layout Planning, Flow Dominance, Complexity Rating, Solution Efficiency

Location Factors, Location Theory, Nature, Significance and Scope of Facilities Layout Planning, Basic Philosophy in Computerized Layout Planning, Construction and Improvement Algorithms, Major features of Improvement Algorithms.

**Course Code: ME43247 (ME)**

**Semester: First**

**Core/Elective: Elective**  
**Contact Hours and Credit:**

L	T	P	Credit
3	1	0	4

**Course Outcomes:** Upon completing the subject, the student will be able to:

1. Acquire knowledge and develop basic understanding of the concepts of optimization and mathematical modelling.
2. Acquire knowledge for basic modelling techniques to formulate the real life practical problems into a mathematical model.
3. Use different direct and gradient based optimisation method to solve single and multivariable un-constrained or constrained nonlinear function for minimization or maximization.
4. Use non-traditional optimization methods such as Genetic Algorithms, Simulated Annealing, Global Optimization.
5. Application of software for optimization and develop the computer programs for different optimization algorithms.
6. Get aware to Goal Programming, Advanced Optimization Techniques and Dynamic Programming

## **Syllabus:**

**Introduction,** Single Variable Optimization, Bracketing Methods (Exhaustive Search Method, Bounding Phase Method), Region Elimination Methods (Interval halving Method, Fibonacci Search Method, Golden Section Method), Point Estimation Methods, Gradient Based Methods (Newton-Raphson Method, Bisection Method, Secant Method, Cubic Search Method)

**Multivariable Optimization Techniques,** Unidirectional Search Methods, Direct Search Methods (Evolutionary Optimization Method, Simplex Search Method, Hooke-Jeeves Pattern Search Method, Powell's Conjugate Direction Method), Gradient Based Methods (Cauchy's Steepest Descent Method, Newton's Method, Marquardt's Method, Conjugate Gradient Method, Variable –Metric Method)

**Constrained Optimization Algorithms,** Transformation Methods (Penalty Function Method, Method of Multipliers), Direct Search (Variable Elimination Method, Complex Search Method, Random Search Method), Linearized Search (Frank-Wolfe Method, Cutting Plane Method), Feasible Direction Methods, Reduced Gradient Methods, Gradient Projection Methods

# राष्ट्रीय प्रौद्योगिकी संस्थान, रायपुर National Institute of Technology Raipur

(INSTITUTE OF NATIONAL IMPORTANCE)  
G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

**Linear Programming**, Simplex Method, Transportation Problem, Dual Phase Methods, Dual Simplex method Non Traditional optimization, Genetic Algorithms, Simulated Annealing, Global Optimization Specialized Algorithms, Software related to Optimization, Goal Programming, Advanced Optimization Techniques, Introduction to Dynamic Programming.

## **Textbooks:**

- [1] S. S. Rao, Optimization: Theory and Applications
- [2] Kalyanmoy Deb, Optimization for Engineering Design
- [3] Mohan C Joshi & K. M. Moudgalya

**DEPARTMENT OF MECHANICAL ENGINEERING**  
**PROGRAMME: M. TECH. IN INDUSTRIAL ENGINEERING AND MANAGEMENT**

**COURSE Title: COMPUTER INTEGRATED MANUFACTURING      CORE/ELECTIVE: ELECTIVE**  
**COURSE CODE: ME432410 ME      CONTRACT HOURS AND CREDIT**  
**SEMESTER: FIRST**

L	T	P	Credit
3	1	0	4

## **COURSE OUTCOMES:**

The student will achieve an understanding of the issues related to computer-integrated manufacturing and the integration of automated processes within a modern manufacturing environment. From the course students are able:

1. To select an automated processes in a modern manufacturing environment.
2. To express engineering design and modeling techniques towards flexible manufacturing system, robotics, numerical control and the integration of computer control/usage in manufacturing.
3. To demonstrate contemporary manufacturing/production strategies such as group technology, rapid prototypes and reverse engineering.
4. To describe the operation and applications of PLC and enhance the quality of product by using CIM & CAQC.

## **SYLLABUS**

### **FUNDAMENTAL OF MANUFACTURING AND AUTOMATION**

Production operation and automation strategies, Manufacturing industries, Types of production function in manufacturing, Production concept and mathematical models, Automation strategies. Cost- benefits analysis.

### **GROUP TECHNOLOGY**

Part families, Part classification and coding, Production flow analysis, Machine cell design, Benefits of Group Technology. Industrial Robotics: Robotic programming, Robotic languages, work cell control Robot cleft design, types of robot application, Processing operations.

### **FLEXIBLE MANUFACTURING SYSTEM**

What is FMS?, FMS work station, Material Handling and storage systems, Computer control system, Analysis methods for flexible manufacturing systems, application & benefits.

# राष्ट्रीय प्रौद्योगिकी संस्थान, रायपुर National Institute of Technology Raipur

(INSTITUTE OF NATIONAL IMPORTANCE)  
G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

## **COMPUTER INTEGRATED MANUFACTURING**

What is CAD, CAM & CIMS? CIM Data base Model and Manufacturing data base. Computer aided process planning, Computer integrated Production Planning system. Brief introduction to concurrent Engineering, Rapid Prototypes and Reverse Engineering.

## **PROGRAMMABLE LOGIC CONTROLLERS**

Parts of PLC, Operation and application of PLC, Fundamentals of Net workings. ; Computer Aided Quality Control: QC and CIM, objectives of CAQC, CMM, Flexible Inspection systems.

L	T	P	Credit
3	1	0	4

## **COURSE OUTCOMES:**

1. To understand the importance of quality assurance in competitive environment.
2. To have an overview of use of statistics in process control.
3. To distinguish between chance cause and assignable cause of variation in quality.
4. To understand methods of sampling inspection.
5. To understand concepts of TQM, Quality circle, ISO 9000 series of standard etc.

## **SYLLABUS**

### ***INTRODUCTION***

Definition and Need of quality, Aspects of quality, Quality of design, Quality of conformance, Quality characteristic, Quality control and Quality Assurance, Economics of quality. Inspection, Its objectives and types, Inspection versus Quality Control, Statistical Quality Control.

***Probability & Statistics:*** Definition, Laws, Probability Distributions (Normal Binomial, Poisson, Exponential) & related problems. Measures of Central tendency & Dispersion, Concept of Variation, Variable and attribute data, Frequency distribution.

### ***STATISTICAL PROCESS CONTROL***

Control Charts, Concept of variability, Assignable & chance causes, Concept of specifications and tolerances, Definition and objectives of control charts, Control charts for variables and attributes & related problems, Variable charts vs attribute charts, Patterns on control charts, Type-I & Type-II Errors, Process capability and its methods of determination.

### ***ACCEPTANCE SAMPLING***

Definition, Advantages over 100% inspection, Methods of taking samples, operating characteristics curve. Single, Double and Multiple sampling Sequential Sampling Plan & Related problems.

**Department of Mechanical Engineering**  
**Programme: M. Tech. in Industrial Engineering and Management**

**Course Title: Logistics and Supply Chain Management**  
**Course Code: ME43212ME**  
**Semester: Second**

**Core/ Elective: Core**  
**Contact Hours and Credit:**

L	T	P	Credit
3	1	0	4

**COURSE OUTCOMES:** After studying this subject, Student will be able to:

1. Understand the nature of supply chains and trace the historical perspective, leading to their development and growth.
2. Identify the goal of a supply chain and find out the impact of supply chain decision on the success of the firm.
3. Design distribution network with strength and weakness of various distribution options of SCM.
4. Synthesize different real life cases and establish strategic fit between the supply chain strategy and the competitive strategy.

## **SYLLABUS**

### ***INTRODUCTION TO SUPPLY CHAIN MANAGEMENT (SCM)***

Concept of Logistics Management, Concept of supply management and SCM, Component, Benefits of SCM, Core competency, Value chain, Elements of supply chain efficiency, Flow in supply chains, Key issues in supply chain management, Trends in Supply Chain, Supply Chain Planning, Decision phases in supply chain, Supply chain integration, Process view of a supply chain, Competitive Strategy and supply chain strategies, Uncertainties in supply chain, Supply chain drivers. Bullwhip Effect and Information Sharing, Push and Pull Supply Chain.

### ***FORECASTING AND INVENTORIES IN A SUPPLY CHAIN***

Forecasting and its role, characteristics of forecasts, classification, forecasting methods, Integrate demand planning and forecasting through SC.

Planning and managing inventories in SC: Goals, role, effects of cyclic inventory in SC, effect of lot size, Economic order quantity, Quantity Discount, Strategic change

### ***SOURCING AND PROCUREMENT***

Outsourcing benefit, Importance of suppliers, evaluating a potential supplier, Supplier selection, Supply contracts, Competitive bidding and Negotiation, E-procurement

(INSTITUTE OF NATIONAL IMPORTANCE)  
G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

## ***PURCHASING***

Objectives, Relations with other departments, Centralized and Decentralized purchasing, Purchasing procedure, Types of orders, Tender buying, Purchasing department records, Computer based systems/EDI.

## ***SUPPLY CHAIN DISTRIBUTION AND LOGISTICS STRATEGY, INTEGRATION, AND RISK POOLING***

Supply chain integration, Facility Sizing/Space Requirements, Warehouse Management Systems, Storage Systems, Order Fulfilment Methodologies, Material Handling Requirements, Distribution Strategies – Traditional Retail, Direct Shipping, Cross-docking, Cross-dock Operations, Distribution Strategies: Pool Distribution, Transshipment, Milk-Run Systems, Classic Techniques of Risk Management, View of (s, S) Policy, Data analysis, Pooling based on Location, Product, lead Time and capacity.

**Semester: Second**

**Core/Elective: Elective**  
**Contact Hours and Credits:**

L	T	P	Credit
3	1	0	4

## **COURSE OUTCOMES:**

At the end of the course, Student will be able:

1. To summarize conceptual model of ERP system and to discover scope and functions of ERP system.
2. To categorize ERP system and other information system to improve overall performance of an organization.
3. To evaluate / measure success of ERP system and other related systems for betterment of an organization.
4. To predict present and future of ERP system and e-commerce.

## **SYLLABUS**

### ***INTRODUCTION***

Concept of ERP, Origin, Evolution of ERP, Conceptual Model of ERP, The Structure of ERP, Need of ERP, Advantages and Disadvantages of ERP, Functions of ERP, Overview of available ERP Packages and Tools.

### ***ERP AND RELATED TECHNOLOGIES***

Business Process Reengineering(BPR), Data ware Housing, Data Mining, Online Analytic Processing(OLAP), Product Life Cycle Management(PLM),Supply chain Management(SCM).

### ***ERP MARKETPLACE AND MARKETPLACE DYNAMICS***

Market Overview, Marketplace Dynamics, the Changing ERP Market, ERP in Indian Scenario.

***ERP- FUNCTIONAL MODULES:***Introduction, Functional Modules of ERP system, Integration of ERP, Supply chain and Customer Relationship Applications.

### ***ERP IMPLEMENTATION, ERP IMPLEMENTATION LIFE CYCLE***

ERP Package selection, ERP Transition Strategies, Success and Failure Factors of an ERP Implementation. Measurement of Success of ERP System and other Related Systems.

**COURSE CODE: ME43215 ME**  
**SEMESTER: SECOND**

**CORE/ELECTIVE: CORE**  
**CONTRACT HOURS AND CREDIT**

L	T	P	Credit
3	1	0	4

### COURSE OUTCOMES:

The focus of Product Development and Management is integration of the marketing, development, and managerial decision of the firm in creating a new product. The course is intended to provide the following benefits:

- Competence with a set of tools and methods for product development and design.
- Confidence in the ability to create a new product.
- Awareness of the role of multiple function in creating a new product (e.g. marketing, finance, industrial design, engineering, production).
- Ability to co-ordinate multiple interdisciplinary task in order to achieve a common objective.
- Enhanced team working skills.

### SYLLABUS

#### ***DEVELOPING PRODUCT***

Need for Developing Product, Concept Generation, Key Concept In Innovation, Thinking For Innovation, And Various Element Of The Innovation Cycle, Ideation Involving User Interaction, Need Identification And Co-Creation, Triz: Theory Of Inventive Problem Solving, Assessment Of Potential Of Technology For Success, Producer To User Innovation. "Lead User" Innovation Communities and Innovators, Toolkit to Support Product Development by Customers, Tools and trends in product development.

#### ***EVALUATION***

Demand Forecasting, Decision Making and Concept Selection, Evaluation Methods

#### ***ECONOMIC DECISION MAKING:***

Mathematics of Time Value of Money, Cost Comparison, Depreciation Texas Profitability of Investments, Other Aspects of Profitability, Inflation Sensitivity and Break Even Analysis.

(INSTITUTE OF NATIONAL IMPORTANCE)  
G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

## ***UNDERSTANDING MARKETING MANAGEMENT:***

Capturing Marketing Inside, Connecting with Customers, Creating Brand, Setting Product Strategy and Managing Services, Delivering and Communicating Value, Creating Long term Growth.

## ***PROTOTYPING***

Familiarization of solid modelling techniques and software. Basic principle of rapid prototyping processes. Industrial RP system, Role of Rapid Prototyping and Rapid Tooling in Product Development and Simultaneous Engineering. Introduction to reverse engineering, Integration of Reverse Engineering and Rapid prototyping, Application and use of Reverse Engineering in Product Development.

**Department of Mechanical Engineering**

**Programme: M. Tech. in Industrial Engineering and Management**

**Course Title: Financial Accounting**

**Course Code: ME43215 ME**

**Semester: Second**

**Core/Elective: Core**

**Contract Hours and Credit:**

L	T	P	Credit
3	1	0	4

## **Course Outcomes:**

At the end of this course, the students will be able to:

1. Understand the concepts of accounting concepts, conventions and process.
2. Enable preparation of financial statements.
3. Analyze and interpret financial statements.

## **Course Objective:**

To acquaint students with the system of collecting, summarising, analysing and reporting information in monetary terms so that interpretation of this information could be used by various stakeholders.

## **Syllabus:**

### **Introduction to financial accounting:**

Conceptual framework of financial accounting, language of accounting, accounting conventions and concepts, revenue recognition and measurement, matching of revenues and expenses.

### **Basics accounting mechanics:**

Basic records, theory, and practice of measurement of business income, Capital vs. Revenue Expenditure, Financial statements like balance sheet, profit and loss accounts and related concepts, Accounting Equation.

### **Preparation and Presentation of Balance sheet of companies:**

Balance sheet related concepts – Reporting of Assets of liabilities under Companies Act – Auditors' Report. Common-size Financial Statement – Concept of Window dressing.

### **Analytical review of Financial Statements:**

Profitability Statements - COGS, EBDIT, EBIT, Operating profit/loss, PBT, PAT; Ratio Analysis – Profitability Ratios, Liquidity Ratios, Turnover Ratio, Solvency Ratios, Uses of Ratios for Internal Management

### **Fund Flow and Cash Flow Statements:**

# राष्ट्रीय प्रौद्योगिकी संस्थान, रायपुर National Institute of Technology Raipur

(INSTITUTE OF NATIONAL IMPORTANCE)

G.E. Road, Raipur, Chhatisgarh - 492010, C.G. (INDIA)

Fund flow statement - Determining the sources and uses of working capital. Cash flow analysis - concept, purpose and relevance. Role of cash flow analysis in financial decision making. Preparation of cash flow statement under operating, investing and financing activities.

**Course Code: ME43115 ME**

**Semester: Second**

**Core/Elective: Core**

**Contract Hours and Credit:**

L	T	P	Credit
3	1	0	4

**COURSE OUTCOMES:** The focus of Management and Productivity is Improve personal skills in managing workload & conflicting priorities. Develop a structured & systematic approach to productivity bottlenecks & learn practical techniques to streamline & reach your productive peak. At the end of the course student will able to:

- Described the core features of the management and productivity management function at the managerial and strategic levels, specifically the relationships between people, process, technology, productivity and quality and how it contributes to the competitiveness of firms.
- Explain the various parts of the management and productivity processes and their interaction with other business functions (strategy, engineering, finance, marketing, HRM, project management and innovation)
- Apply and analyze the value analysis (VA), value engineering (VE) and business process reengineering (BPR) to enhance the productivity radically.

## **SYLLABUS**

### ***INTRODUCTION***

Concept, features, natures and importance of management, principles of scientific management, effective management. Productivity concepts-Macro and Micro factors of productivity, productivity benefit model, productivity cycles.

### ***FUNCTIONS OF MANAGEMENT***

Concept of planning and its types, objective and strategy related to planning. Concept of organizing and forms of organization structure. Concept of staffing recruitment, selection, training and development. Motivation theory and applications, leadership. Controlling and its techniques.

### ***VALUE ANALYSIS AND VALUE ENGINEERING***

Concept-procedure-application and role in productivity. Productivity models: Productivity measurement at International, National and organization level, total productivity models. Productivity management in manufacturing and service sector.

# राष्ट्रीय प्रौद्योगिकी संस्थान, रायपुर National Institute of Technology Raipur

## **A case study approach**

Central to this lab class is a team-based learning approach to conceive and develop product/service ideas, by carrying out following procedure:

1. Opportunity Identification: Identification of appropriate project proposals and development of promising opportunities.
2. Product Planning: Demonstration of opportunity (need) for the selected product/service.
3. Identifying Customer Needs: Interpreting data in terms of customer needs and establishment of relative importance of needs.
4. Concept Generation: Clarification of concept, search and exploration of concept.
5. Concept Selection: Concept screening and scoring.
6. Prototyping: Planning and testing.
7. Product Development Economics: Evaluation of capital decision for the selected product/service launch.
8. Result and Discussion: A verbal or visual demonstration of the selected product/service.
